Art Unit 1713

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Alper.

This patent shows hot melt adhesives which can be based on applicants' instantly claimed tackifying resin and thermoplastic polymer. See specifically column 4 lines 5+ as well as Example 2. In view of this disclosure, applicants' claims are not novel.

In the event that one of ordinary skill in the art would not immediately envisage each of applicants' instantly claimed ingredients, then the invention is prima facie obvious from this

patent since it shows the instantly claimed components and suggests to one of ordinary skill in the art that they be used in combination with one another.
